

AMA Penny Press Machine Information

The AMA Penny Press Machine:

- The Penny Press Machine turns small coins into collectible souvenir medallions within a few seconds.
- AMA has been producing the Penny Press for the last 20 years only in Germany.
- AMA is the biggest producer of the Penny Press in Europe.
- Our Penny Press Machines are fully made in Germany and are of very high quality - precision German engineering!

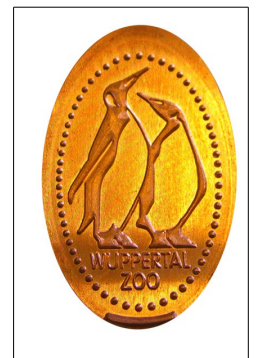

How does it work:

- The customer selects a design by turning the handle, inserts a 1 Euro coin and a 5 Euro cent coin (other currencies are possible, too) and turns the handle a few times.
- The mechanism of gears and rollers inside the machine flattens the coin smooth and imprints a beautiful motive on it turning it into a collectible souvenir. The particular attraction of the process for the customer is that for little more than a Euro, they can make their own souvenir.

AMA Penny Press Machine Features:

- No electricity required – our machines are hand-cranked.
- The Penny Press Machine can be installed anywhere, indoors and outdoors.
- It needs only a small space and is very low maintenance.
- The acrylic cabinet allows customers to view the pressing process.
- Low investment but high profit - unlimited earning potential.
- Very well protected money box - the cash-box of the Penny Press machine is located in a durable steel housing and is doubly secured against breaking-in and vandalism.
- Low investment but high profit - unlimited earning potential.

When you buy one of our Penny Press machines, the price includes:

- The machine itself including a counter, money box and locks.
- Artwork and engraving - custom text and images for your location.
- Custom posters displaying the coin designs.

Options:

- Coins from almost any country can be accommodated.
- If you do not want to use pennies or cent coins, we can build in a distributor for the use of blank coins.
- A wheel can be installed instead of a handle.
- One Penny Press Machine can have up to 3 motives for the customer to choose from.
- We can also place another motive on the back of each of the elongated coins, e.g.: your company name, your logo or a slogan.

Specifications:

- The machine is mainly made of aluminium and stainless steel.
- Total weight of the coin-operated machine is approximately 75 kg.

You'd like to buy one – or more – of our Penny Press Machines – what happens next?

- You simply send us your desired text and a photo or drawing, or just an idea of the motive you would like, by email, and our designer will create a design for you.
- Once the artwork is completed, it will be emailed or faxed to you for your final approval. After that, production begins.
- A deposit equal to 50% of your machine order, including packing and shipping charges, is due with your order, with the balance due before shipment is made to you.
- A one year warranty for parts and workmanship is included on all new machines sold.
- We generally ship 4 to 6 weeks after your artwork has been approved.
